Mining Dairy Data with AI Agents

Pádraig Lucey

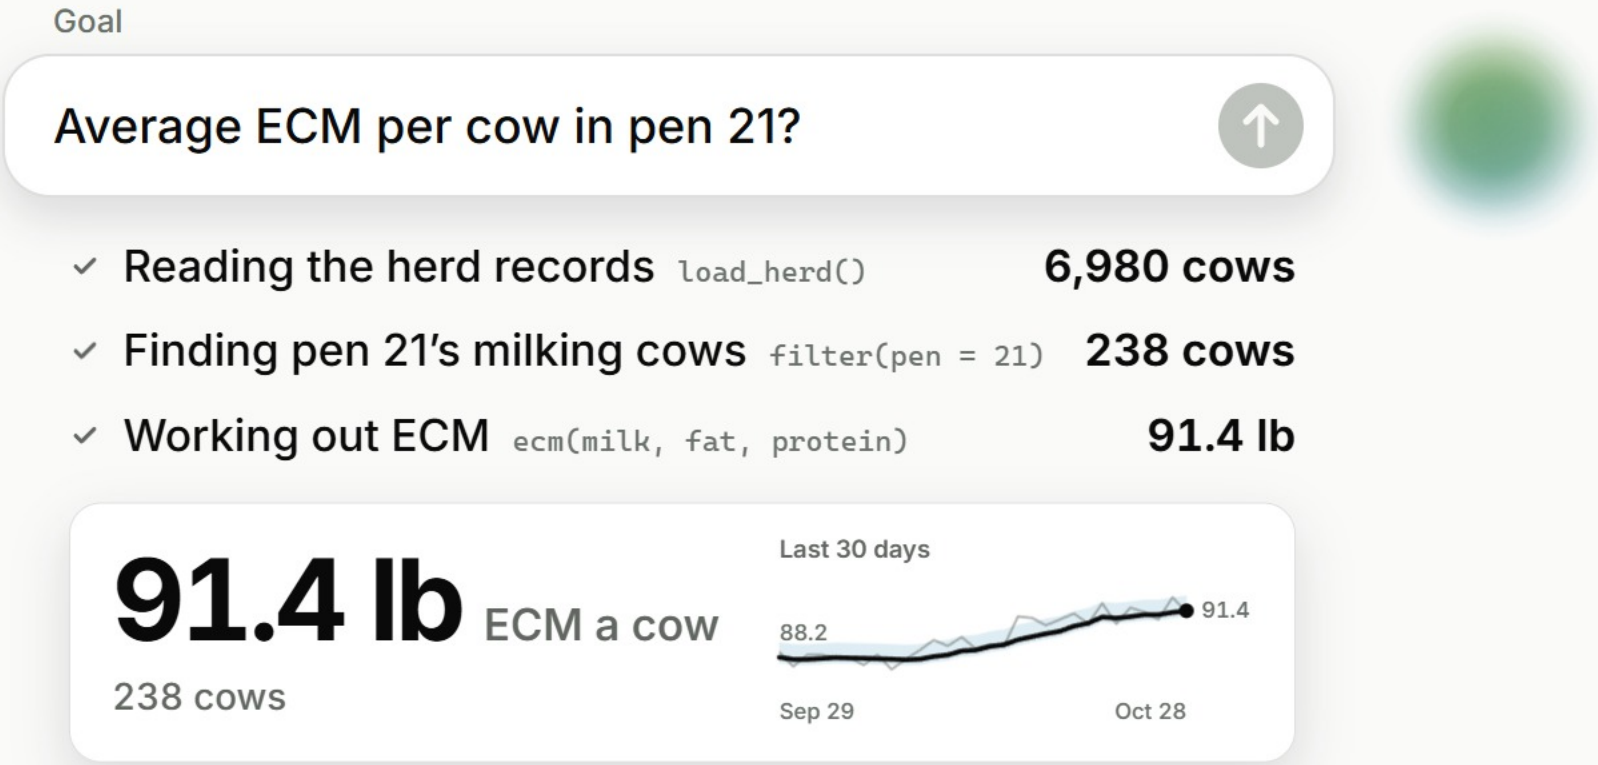

What is an agent?

[An automation that] runs tools in a loop to achieve a goal.

Simon Willison

'AI' is not a tool.

Rich Hickey

Goal

Tell me about pen 21's intake over the last month, what's changed, and how the cows are responding.

Worked for 4 s · 3 steps | New corn silage pile | + ½ lb more bypass fat | − ½ lb less rolled corn

✓ Opening pen 21 `open_pen(21)` 75 days

Pen 21

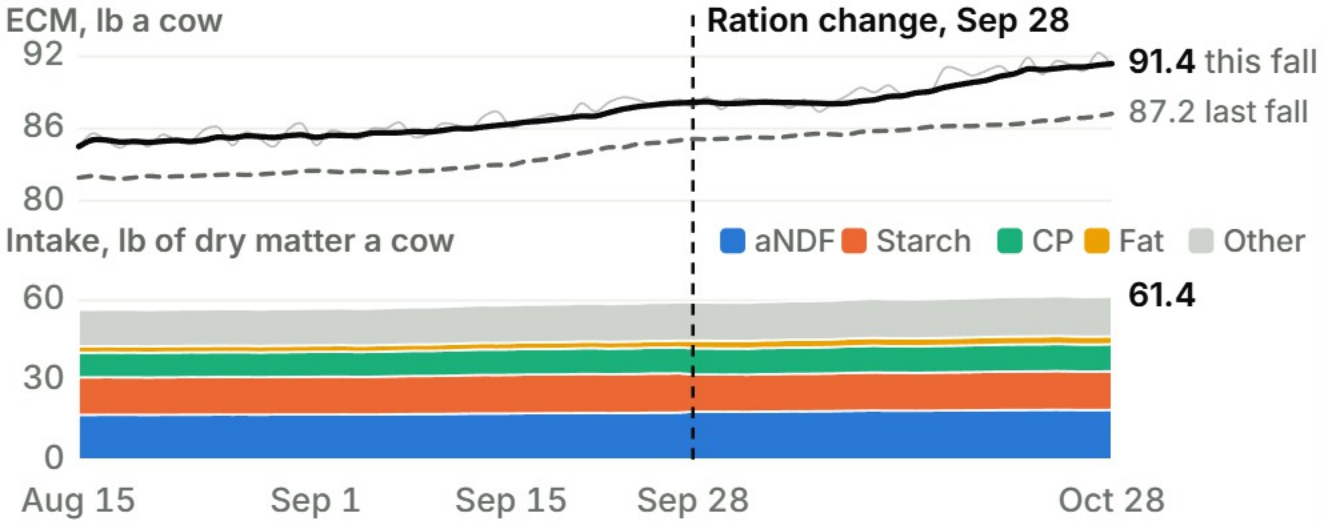

238 cows · High cows · Aug 15 to Oct 28

Milk a cow, last test
90.6 lb Highest of 12 pens
Middle 80%: 73–108 lb

Days in milk
52 median
Middle 80%: 31–74 days

Lactation
3rd median
2nd 84 · 3rd 51 · 4th+ 103

Intake, last 7 days
61.4 lb formulated 63.0
Daily, the last 30 days

Maybe this change is just seasonal?

Checking the same weeks last fall.

ECM is up 3.3 lb since Sep 28. Last fall, same weeks, no ration change: up 2.2 lb.

Goal

Tell me about pen 21's intake over the last month, what's changed, and how the cows are responding.

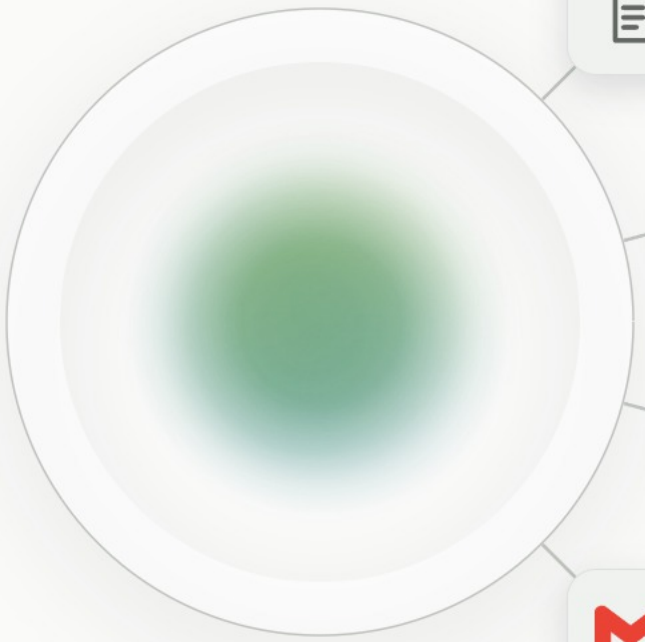

Model, harness, agent

The model

Reads your prompt and predicts the words that come next.

The harness

Gives the model its tools, and runs them.

Tools

Read a data file
↩ Cow file and feed report

Weather station API
↩ Temperatures, both weeks

Run statistics
↩ A difference from Sep 28

Email MCP
↩ 2 lab reports

After Harness Engineering 101, Isuru Wijesiri, 2026

AGENTS

Nutrition · Herd A · close-up pen

No Close Up Mineral in the 13 Oct premix

Close Up Mineral	**0** of 1,410 lb
Fed to the close-up pen	**14–16** Oct
The 12 batches before	1,450–2,110 lb

HOW WE KNOW

The wagon scale gained 0 lb during the Close Up Mineral step. EZfeed loading records.

Close-up minerals often carry the anionic salts that lower milk fever risk.
Santos et al., J Dairy Sci 2019

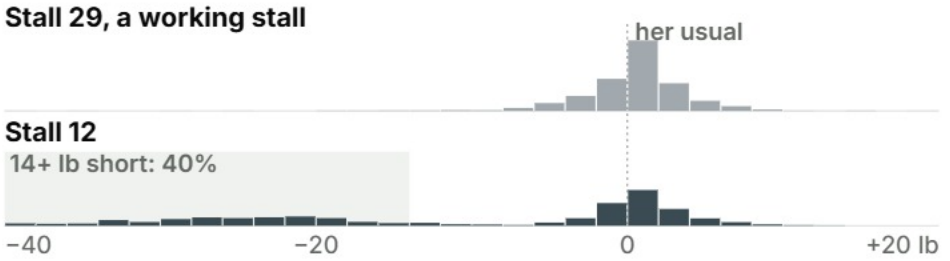

Did the 13 Oct batch get its Close Up Mineral?

Yes | No | Don't know

Milk · Herd B · rotary parlor

3 stalls milk low

Stall 12	**−10.2** lb a milking
Stall 57	**−8.9** lb
Stall 73	**−7.8** lb
The other 77 stalls	−2.9 to +2.4 lb

HOW WE KNOW

40% of stall 12's milkings came in 14 lb or more short of the cow's usual; 1% in a working stall.

Meter or milking unit? A meter reading short loses nothing; a unit not milking out leaves about 1,300 lb a day in the cows.
Andreen et al., J Dairy Sci 2020

Have stalls 12, 57 and 73 been checked?

Yes | Not yet | Don't know

AGENTS

Two different harnesses

🧩 **Mini Crossword**

Fill in the squares using the clues below. Each number marks the beginning of a word.

Plain text

1	2	3
4		
5		

➡️ **Across**

1. A small feline pet (3 letters)
4. To exist, as in "you ___ here" (3 letters)
5. The number after nine (3 letters)

⬇️ **Down**

1. A small feline pet (3 letters)
2. A word meaning "to exist", used with "you" (3 letters)
3. The number after nine (3 letters)

Here's the completed crossword with the answers filled in. 🧩

Plain text

C	A	T
E	S	T
T	E	N

Across

1. CAT 🐱
2. EST (short for "exists")
3. TEN

Down

1. CET
2. ASE
3. TTN

Note: The original puzzle's down clues don't produce valid English words, so this isn't a properly constructed crossword. I can make you a proper crossword with interlocking words and a complete, correct solution instead!

Assistant

Qwen3.6 35B-A3B

```
herd <- load_herd("data/clean")   # your DairyComp exports, cleaned

fresh <- c("milk_fever", "retained_placenta", "metritis",
           "ketosis", "displaced_abomasum")
cases <- subset(herd$events, std_event %in% fresh & dim_at_event <= 60)
cases$dim <- cut(cases$dim_at_event, c(-1, 7, 14, 21, 30, 60),
                 labels = c("0-7", "8-14", "15-21", "22-30", "31-60"))
table(cases$std_event, cases$dim)
```

Output

	0-7	8-14	15-21	22-30	31-60
displaced_abomasum	0	6	8	7	0
ketosis	13	30	27	0	0
metritis	27	61	0	0	0
milk_fever	17	0	0	0	0
retained_placenta	55	0	0	0	0

Milk fever and retained placenta are all in the first week; metritis peaks in week two, ketosis in

REVERSE ENGINEERING

Reverse engineer anything

`github.com/morluto/rea`

One install line gives an agent the tools to take software and machines apart.

github.com/morluto/rea, 27 Oct 2026

★ 397,785

stars in six months

99,759 copies people took to build on

- Old hardware
- Smart TVs
- Apps
- Farm machines

REVERSE ENGINEERING

The calf milk pasteurizer

THE NEED

Its alerts only reach a phone standing next to it

The machine talks Bluetooth, to its own phone app

HOW WE READ IT

A Raspberry Pi listens for the same Bluetooth signal

The temperature and minutes left, decoded from the bytes, every few seconds

WHAT IT DOES

Works out each cycle and texts the crew when bags are ready

In English or Spanish. Controls cycles remotely.

SINCE 31 JULY

227 cycles and 1,833 texts at two dairies

The machine is untouched

GUARDRAILS

When agents go wrong

Summer Yue
@summeryue0 · Follow

Nothing humbles you like telling your OpenClaw "confirm before acting" and watching it speedrun deleting your inbox. I couldn't stop it from my phone. I had to RUN to my Mac mini like I was defusing a bomb.

So muse handled my Facebook marketplace today. Just found out it told people my address and agreed a lowball price and then they showed up without it even telling me until late tonight that it messed up.

Absolutely wild.
